Problem 1 – Sweet Home

Create a Web page (HTML5 + CSS3 + images) that looks and behaves like the screenshots below:

WELCOME

We will help you to find your new home

Welcome to Sweet house rental company and thank you for taking the time to visit our site! Our company is the market leader in the area providing a professional comprehensive lettings agency and property management service from our computer linked offices. In today's real estate market, renting is becoming a popular option again for a lot of people. We pride

ourselves in service we provide. Sweet house works hard and will stay in constant contact with client to help him find the perfect home in the area. We have a portfolio of properties to let from different shapes and sizes including student accommodations, studio flats, rooms in house shares, self contained flats, apartments, houses, cottages, bungalows and smallholdings.

You are given the above screenshots + all required images + the texts on the site.

Output

The output should be valid HTML5 + CSS3 + images that implement the above Web page.

Constraints

- Use google font Open Sans https://fonts.google.com/specimen/Open+Sans
- The site should open correctly in the latest version of Chrome
- Pixel-perfect implementation is not required.
